

# Analogue Media Technologies Inc. Printing Templates – Beta version

This document contains dozens of templates and folding diagrams for many of the products we print. You may use these templates in programs like Corel Draw, Adobe Illustrator, Quark Express, Freehand, etc...

If reading this document in Adobe Acrobat, notice that the page size is 17” high by 27” wide. It is not really designed for printing on a desktop printer, although you could print selected pages by tiling the output.

Using these templates

Method 1 -Copy and paste

- Zoom Acrobat reader to “Actual size” or 100%
- Press the “Graphic select” icon (hint: press and hold the “Text select” icon)
- “Select all” or Ctrl-A
- Copy
- Switch to your layout program, and Paste.
- You should then have an accurately sized color bitmap to work on.

Method 2 - Open this PDF document in Corel or Illustrator

- Find the template you want and copy it to your working document
- Note that this is a big document, so make sure you have sufficient computer power to open it.

Method 3 - Print to an EPS file

- If you have a postscript print driver, you should be able to print your selected page to a file, and then open this in Corel Draw or Illustrator.

Please note that we are in no way responsible for any errors you may make in using these templates. We recommend sending your finished file to us for film output, or having us do the layout for you.

You may notice some products contained herein are missing templates... These will be included as time permits and if demanded. If you do not see a product you are searching for, enquire to see if it is available.

We can also make a custom die for your project if needed. Please submit a mock-up of your idea. A die will generally cost \$500 US or more, depending on its complexity.

For assistance with these templates email [george@amtechdisc.com](mailto:george@amtechdisc.com) or call 1-800-777-1927.

Please note that these templates are all copyrighted and use of these templates and diagrams is only permitted for customers of Amtech. All use by other printing companies, die-making companies, media duplicators and replicators is strictly forbidden.

## CD JEWEL BOX BOOKLET INSERTS

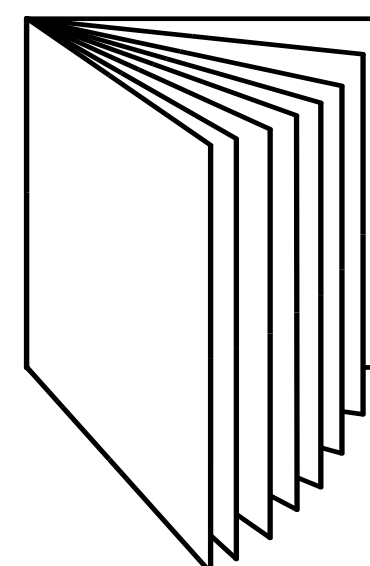

Use Design 21002, 2 panel folder, as the template for booklets. All pages must be supplied in printer spreads, not reader spreads (ie. Put together pages 1 & 16, 2 & 15, 3 & 14, etc...).

REF. TRAY CARD  
 DESIGN # 21000  
 O.B. 4.625" X 5.9063"

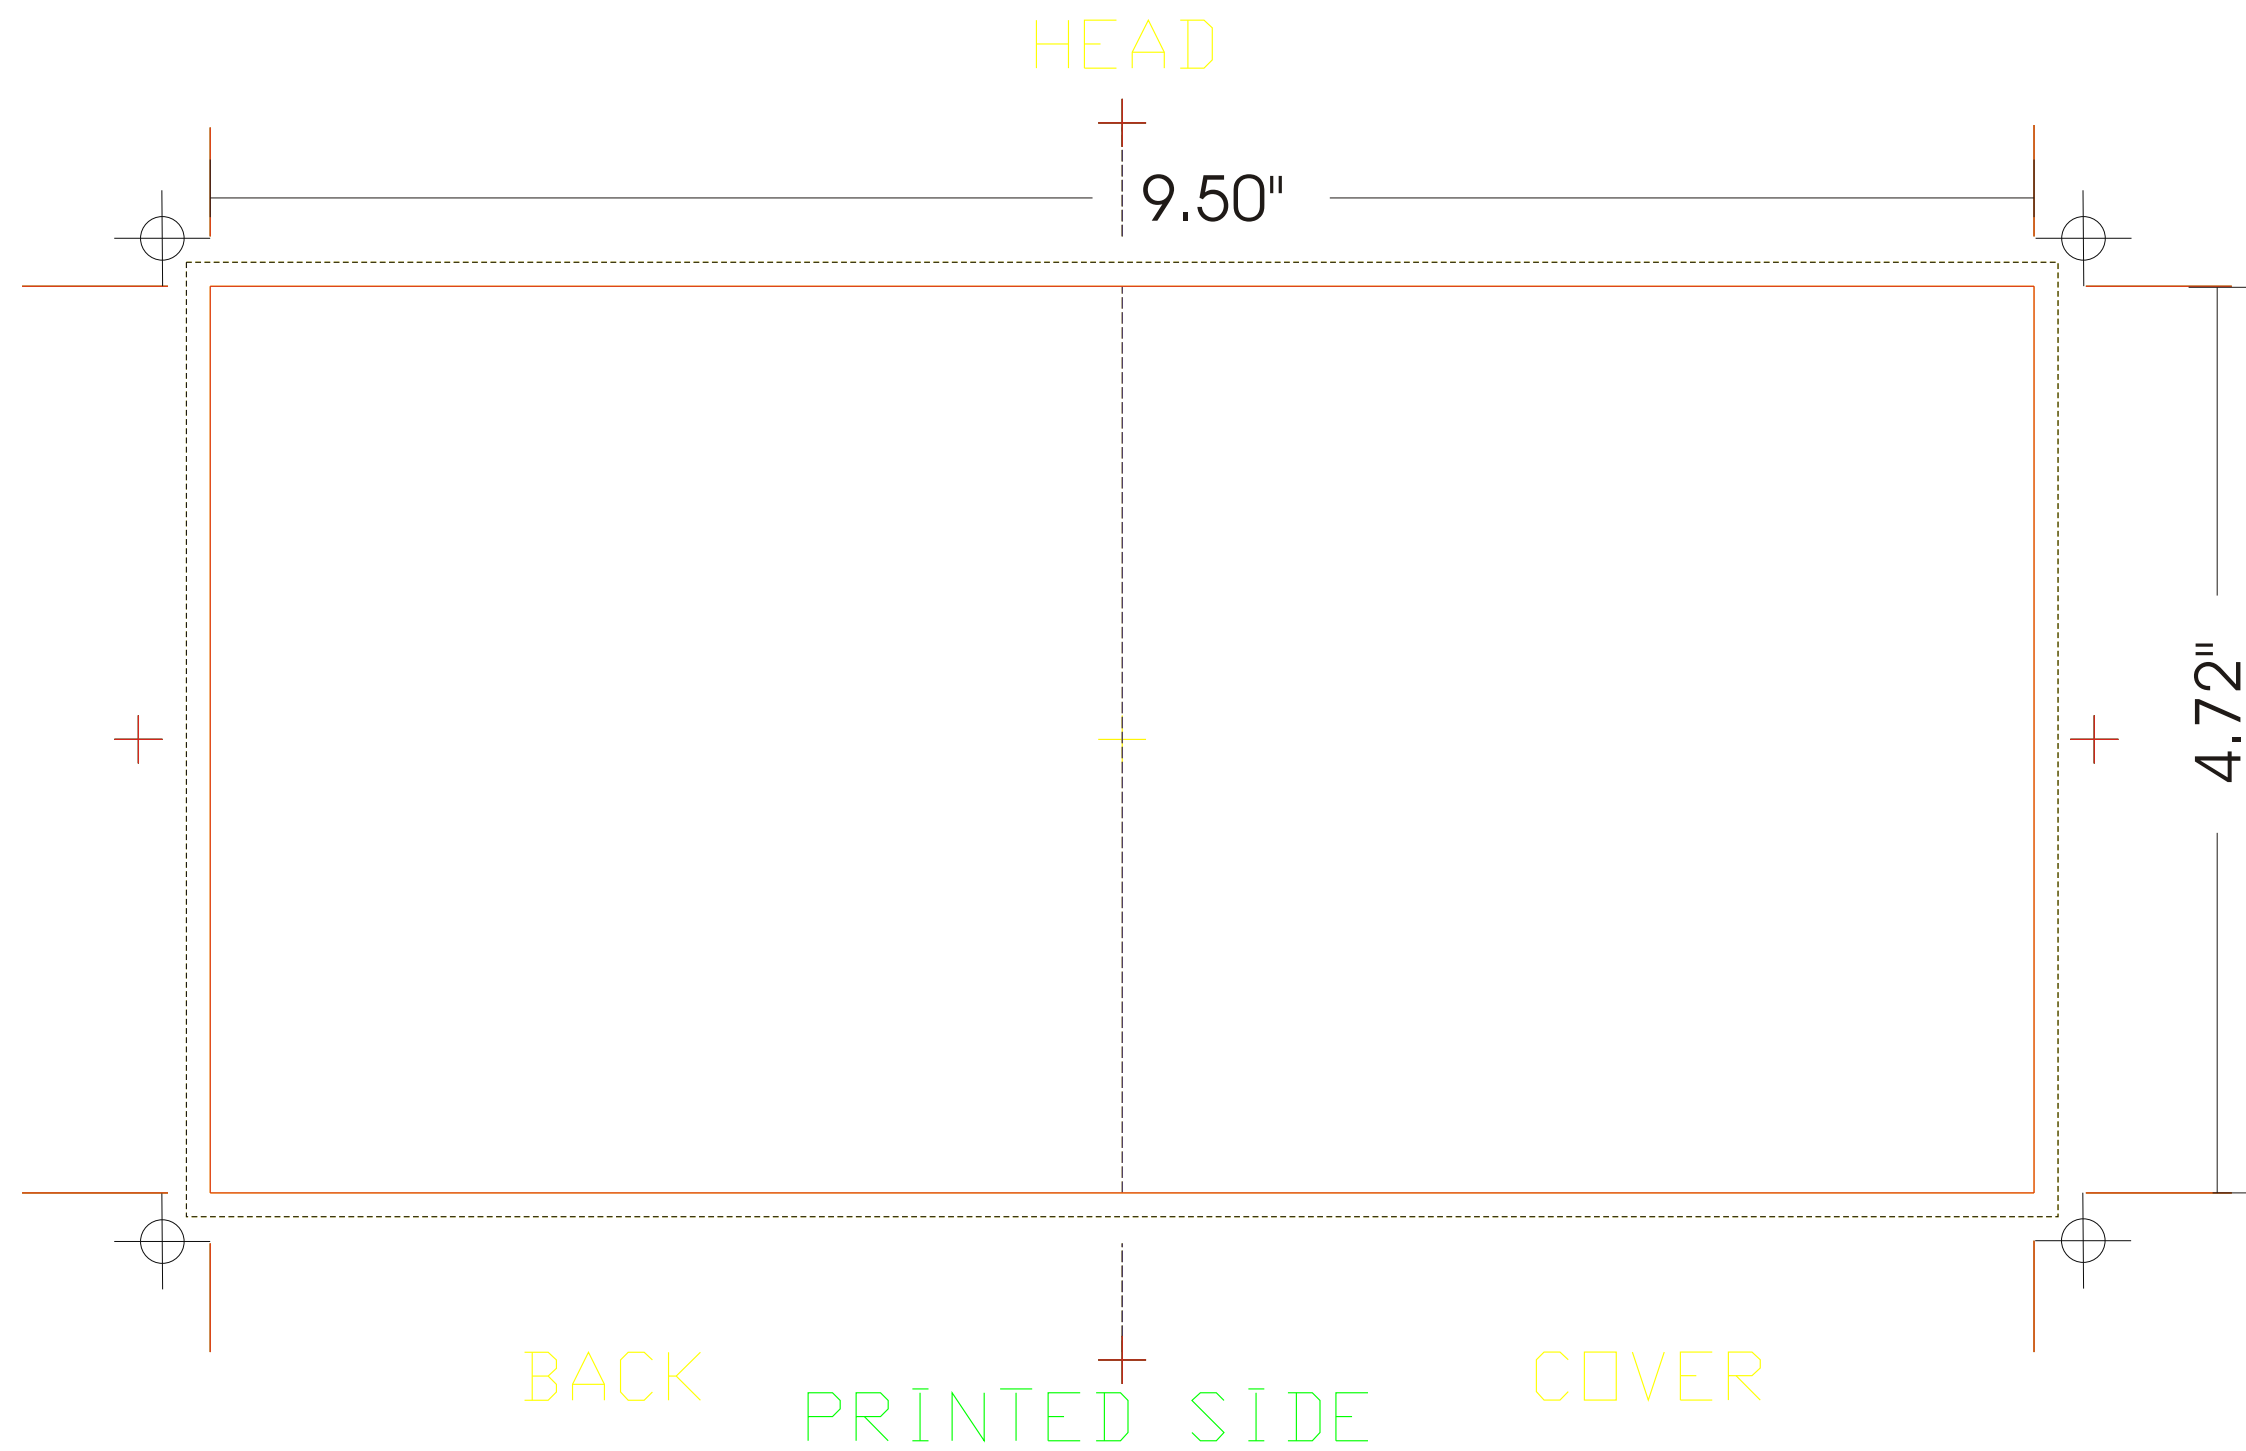

The measurements of the tray card are extremely critical. Small deviations from the proper size may make the card unuseable on the automated machines, resulting in manual packaging fees. The spines must be perforated, not scored.

Normally the tray card should always contain the words "Made in Canada" for compliance with USA and international trade laws.

Please also create a selection number to use on all components for easy identification. For example: put something like MYCD01 on each spine, somewhere on the front insert, on the CD label, and on your master tape or CD.
