

front

All text should remain within the yellow area.

No text should appear inside the pink dot because this area is too close to the centre of the label which will be cut out.

The cut out is indicated by the lighter pink inside the centre of the dark pink. Pictures and printed backgrounds should print through the pink as this will make the job easier to die cut.

The label die cuts to a 4 inch circle which is indicated by the black line.

Pictures and printed backgrounds that are the full size of the label should print 1/8 of an inch past the die cut.

This is indicated by the outer blue line.
